Dires Gobale

Front-end Developer & Full-Stack Developer

dires7481@gmail.com | 0995774866 | Injibara, Amhara, Ethiopia | github.com/DiresGobale

PROFILE

I am a 3rd year Information System student at Injibara University, Ethiopia. With strong curiosity for problem solving and know better and valuable things than yesterday. I am also a creative developer with python based frameworks/libraries. I wanna build a world with easy and simple to live with the help of AI.

SKILLS

Front-end Web Development: HTML, CSS, JavaScript, React.js, Next.js, TypeScript, Tailwind CSS

Back-end Development: Node.js, Express.js, REST API, C#, .NET Framework

Database: MySQL, PostgreSQL, schema design, normalization, ER diagrams

Mobile Development: Flutter, Dart

Design & UI/UX: Figma, wireframing, prototyping, design systems

Web Designer: great web designer with up-to-date softwares

KEY PROJECTS

AI-Powered Employee Recommendation System

React · Node.js · Express · PostgreSQL | 2024

- Full-stack web platform using AI to match candidates to job roles based on skills and semantic similarity
- Recruiter dashboard with candidate rankings, explainable AI scoring, and profile pages

Expense Tracker — Flutter App

Flutter · Dart · SQLite | 2023 — 2024

- Cross-platform mobile app for tracking daily expenses with categories, monthly charts, offline storage
- Designed in Figma first, implemented with clean Material Design

Product Delivery System

React · Node.js · Express · PostgreSQL | 2025

- Full-stack delivery management: order tracking, dispatch, agent assignment, real-time status updates

Course Registration System

React · Node.js · Express · PostgreSQL | 2025

- Student course enrollment system: catalog browsing, registration, prerequisites tracking, admin dashboard

Evaluation Management System

React · Node.js · Express · PostgreSQL | 2023

- Web app for student/instructor evaluations with role-based access, feedback forms, admin reporting

Library Management — Database Design

MySQL · ER Diagrams · Normalization | 2022 — 2023

- Complete MySQL schema (books, members, loans, fines), normalized to 3NF with full ER documentation

COURSES

- Data Structure and Algorithm
- Object-Oriented Programming
- Operating System and System Programming
- Fundamentals of Data Science (Udacity)

EDUCATION

Information System — Injibara University

09/2022 – Present | Injibara, Ethiopia

LANGUAGES

Python — Experienced **JavaScript** — Proficient **C++ and JAVA** — Intermediate

Amharic — Native **English** — Professional Working

INTERESTS

- AI / ML Engineering — I wanna build a world to live with little efforts with the help of AI
- Full-stack web development — building scalable and easy to use websites
